

An all-in-one solution for cities and towns. A new identity card for a digital generation.

The Resident ID is a digital ID card app for town residents, paired with a web-based portal for town administrators.

The service allows town administrators to design and remotely issue digital ID cards to their residents. It provides a secure and contactless way for residents to prove their residency and obtain a digital ID card issued by the town. The town can offer digital ID cards for free or require payment.

Town residents can take advantage of their Resident ID to gain free or discounted access to resident resources, such as pools, recreation centers, beaches, golf courses, and library services. Additionally, local businesses can offer residents discounts for showing the verified Resident ID card of their community.

Resident ID Features

- ▶ Town branded ID Card design
- ▶ In-App Photo Submission
- ▶ Photo Moderation
- ▶ In-app proof of residency / approval
- ▶ Add Multiple Cards
- ▶ Automatic ID Expiration

- ▶ Anti-screenshot technology
- ▶ Physical ID Card Printing

A Digital Resident ID enables an identity credential to be used with ease in and in ways not possible with a physical ID card.

01 Provide residents with a safe contactless ID card issuance process

02 Send custom notifications directly to resident's mobile devices for facility/road closures, town updates, card renewals, town votes, and even emergency alerts

03 Automate attendance at events such as town meetings, events, or recreational facilities

04 Remotely activate, revoke and/or automatically expire digital ID cards

05 Issue temporary ID cards to guests and volunteers with Residents using town facilities
