App Accessibility

Creating accessible apps for all users and enabling institutions to be compliant with accessibility laws.

Dedication to Accessibility

The ID123 team is committed to making sure our digital ID cards are inclusive and accessible to all users. We regularly work to ensure our digital ID card apps comply with all major accessibility laws and the standards set in WCAG 2.0 Level AA. Our mobile ID card apps have been designed so that their content is accessible to a wide range of disabilities including vision, mobility, and hearing.

Accessibility Testing

Our team regularly tests our digital ID applications internally with our own dedicated Q&A team and accessibility experts. We also enable independent testers with disabilities to test new application builds and provide direct feedback.

App Accessibility Features

Prominent native mobile device accessibility features.

VOICE OVER & TALK BACK
Tap on the screen to hear items spoken back to you.

CHANGE TEXT SIZE
Change the device text to be either bigger or smaller.
